PROFESSIONAL PROFILE

A final year BSc Creative Computing student at Bath Spa University, who has a strong background in full stack web development, UI/UX design, game development and machine learning. Proven with client-based projects, real-time application deployment, and through the entire product lifecycle, from research and design to development and deployment. Enthusiastic about developing digital products that are technically sound and aesthetically pleasing.

EDUCATION

BSc (Hons) Creative Computing 2023 – 2026
Bath Spa University, Bath, UK

- Final year student — expected graduation 2026.
- Key modules: Web Development, Ideation and UX Design, Smartphone Apps, Indie Game Design (Unity), Machine Learning, cyber security, Code Lab.
- Developed a strong dual expertise in creative design and software engineering across all three years.

PROJECTS & WORK

DentaCare — Full-Stack Dental Clinic Web Application 2025
HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, Google OAuth · Deployed on Render

- Built a complete full-stack web app featuring Google OAuth login, real-time appointment booking with live slot availability, and an admin dashboard.
- Implemented secure backend with Express.js and MongoDB; deployed live on Render.

Fill Lè Heart — Real Client Website 2025
HTML, CSS, JavaScript, Figma · Live: fillehearts.vercel.app · Group Project

- Secured a real business collaboration with Fill Lè Heart (India's first Omani Halwa brand) as part of the Creative Industry Challenge module.
- Designed and developed a fully responsive website with product listings and contact pages — deployed live on Vercel.

INVIO — Event Invitation Platform 2026
HTML, CSS, JavaScript · Live: invio-invites.vercel.app

- Designed and developed a live event invitation web platform with clean UI and responsive layout; deployed on Vercel.

Poolme — Carpooling App UI/UX Design 2024
Figma — High-Fidelity Interactive Prototype

- Conducted user research, competitor analysis, and iterative design to create a fully interactive hi-fi prototype for a carpooling mobile app.
- Delivered user testing with real participants and incorporated feedback into the final design.

Loan Estimator — Machine Learning Model 2026
Python, scikit-learn, Random Forest Regression, Gradio · Published on Kaggle

- Trained a Random Forest Regression model on the German Credit Dataset to predict loan amounts; built interactive Gradio UI for real-time prediction.
- Published on Kaggle with YouTube demo video.

Formula Dash 2D — Endless Racing Game 2024
Unity, C# · Published on itch.io

- Designed and developed a complete 2D endless F1 racing game in Unity with C# scripting; published publicly on itch.io.

Chromix & Productiv — Android Applications 2024
Android Studio, Kotlin/Java

- Chromix: RGB colour calculator with real-time colour mixing. Productiv: full CRUD task management app — both built in Android Studio.

TECHNICAL SKILLS

Development

- HTML / CSS / JavaScript
- MongoDB
- Python
- Machine Learning
- Android Studio (Kotlin)
- Unity & C#
- Git & GitHub
- REST APIs & OAuth

Design & Creative

- Figma
 - UI / UX Design
 - Responsive Web Design
- Data Visualisation
 - Canva
